SEGA DREAMCAST JUMP PACK™

When inserted into the Expansion Socket of a Sega Dreamcast Controller or other compatible peripheral equipment, this peripheral provides a vibration effect that can considerably enhance the game play experience.

When the JUMP PACK is inserted into Expansion Socket 1 of the Sega Dreamcast Controller, the JUMP PACK does not lock into place and may fall out during game play or otherwise inhibit game operation.

To return to the title screen at any point during game play, simultaneously press and hold the A, B, Y, X and Start buttons. This will cause the Sega Dreamcast to soft-reset the software and display the title screen.

MENU SELECTION

Press the Directional button Up, Down, Left or Right to highlight options.
Press the A button to select options.
Press the B button to go to the previous menu.
Press the Start button to pause the game and display the Pause Menu.

NOTE

Never touch the Analog Thumb Pad or Triggers L/R while turning the Sega Dreamcast power ON. Doing so may disrupt the controller initialization procedure and result in malfunction.
Before you begin your kombat, familiarize yourself with the Move Kontrol Index. Use this index to master the fighting moves for each character (see The Warriors, pgs. 23-33). There, you’ll find various moves for each fighter.

**Move Control Index**

- **Directional button**: Up, Down, Back, Forward, (U, D, B, F)
- **U**: Up
- **D**: Down
- **B**: Back
- **F**: Forward
- **LP**: Low Punch
- **LK**: Low Kick
- **HP**: High Punch

- **BLK**: Block
- **RN**: Run

If you’re not happy with the initial controller configuration, you can modify it the way you like (see Configure Controller, pg. 12).

At the Main Menu, press the Directional button Up or Down to highlight an option, then press the A button to select from one of the many game modes. They are:

**Arcade**

**1 on 1 Kombat**

It’s you against the CPU. You select one character, then go to the Destiny Screen to choose the difficulty of your journey. Also, you can take on a buddy in a 2 player game. Each player selects one character, then goes straight to a “Kombat Zone” to battle it out.

**2 on 2 Kombat**

Select 2 characters, then take on 2 characters chosen by the CPU. You’ll then go to the Destiny Screen to select the difficulty of your opponents. When you or the CPU loses the first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

Also, you and a friend can choose two characters, then battle it out. When a player loses his first match, the second chosen character will appear to continue the battle. A loser is determined when both chosen players have been eliminated.

**Team**

You take on the CPU or a friend with a team of MK Gold characters. When you select this game mode, you’ll go to the Choose Team Size Screen. Press the Directional button Up or Down to highlight options. To select the size of a team, press the Directional button Left or Right. When your team sizes are set the way you want, select Choose Team Members to set up your team. You’ll
VIEW THE CHARACTER/TEAM SELECT SCREEN. FOLLOW ON-SCREEN INSTRUCTIONS TO SET UP YOUR TEAM. SELECT BEGIN FIGHT WHEN YOU'RE READY. PRESS THE START BUTTON TO CHANGE THE TEAM TO HUMAN. (SEE TEAM, ON THE PREVIOUS PAGE, FOR TEAM SELECTION INSTRUCTIONS.) THE PLAYER WHO LOSES ALL HIS CHARACTERS FIRST WILL BE DEFEATED.

ENDURANCE
You'll view a sub menu when you select this option. When you select Endurance from the sub menu, you'll select a character, then go to the Destiny Screen to select a difficulty. You'll fight one round at a time against each character on the column you choose on the Destiny Screen. Your Health never regenerates in any Endurance mode, and you must win every match to claim victory. Lose one match, and the game is over.

VS ENDURANCE
The CPU chooses the characters for you and a friend in a pre-determined order. Both players use each standard character in the game to continue battling each other. When one player uses all of the games standard characters, the endurance match is over. The player with the most wins claims victory.

ULTIMATE ENDURANCE
You'll fight one round at a time against each character in the game. Lose one match, and the game is over. When you're finished (win or lose), your Ultimate Kombat Rating will be displayed with statistics and a Kombat rating level.

TOURNAMENT
The Tournament Mode lets you select a 4 or 8 player tournament. Up to 3 or 7 of your friends can participate to complete a tournament field. Here's how (see next page):

TOURNAMENT SETUP
When you select Tournament from the Main Menu, you'll view the Tournament Setup Screen. Press the Directional button Left or Right to select a 4 or 8 Player tournament. Highlight Show CPU Battles, then press the Directional button Left or Right to toggle between Skip and Show CPU Battles. Select Number of Fighters, then press the Directional button Up or Down to highlight a character for each of the players. Press the Directional button Left or Right to cycle the available characters, then press the A button to cycle between Human and CPU controlled players. To change the difficulty level of a player, press the X button. Repeat this process until the tournament is set up the way you want. Press the Start button to view the Tournament Bracket, then press the A button to begin fighting.

PRACTICE
Select this option to practice your MK fighting skills. You'll view the Practice Mode Screen to set up your practice session the way you want. Press the Directional button Up or Down to highlight an option, then press Left or Right to cycle through the options. Here are the options:

PLAYER 1 & 2 (character name)
Select the player you want to practice with and against.

DIFFICULTY
Set the level of difficulty you want to practice against.

OPPONENT ACTIVE/INACTIVE/HUMAN
You can practice against active characters that fight back or make them inactive to just stand there and take it. Select Human if you want to practice with a friend.
Options (cont’d)

Kombat Zone
Choose the arena where you want your practice session to occur.

Practice Info On/Off
Select ON to display the buttons pressed during a move.

Configure Controller 1 & 2
Make modifications to the initial controller configuration. Press the Directional button Up or Down to select the button you want to modify, then press Left or Right to cycle through the available controls for that button. Select Initial Settings to return to the initial settings. Repeat the process until you have the controller set up the way you want, then select Exit to return to the Options Screen.

Difficulty
Set the game’s difficulty to 1 of 6 available settings that range from Very Easy (easiest) to Ultimate (hardest).

Rounds to Win
Select the number of wins it will take to win a match and defeat your opponent. Choose from 2 to 9 wins.

Continues
Whenever you lose a match, you can press the Start Button to continue your current battle against a human or CPU opponent. You can set the amount of Continues from 0 to 9. Of course, if you select 0, you will not be given an opportunity to continue the game.

VS Screen
You can Enable or Disable the VS Screen that appears prior to each match. Remember, if you disable this option, you won’t be able to enter codes prior to a match (see Secret Kodes, pg. 20 - 21).

Jump Pack Enabled
Enable or disable your Sega Dreamcast Jump Pack (see pg. 7 for details)

Blood
Set this option to Enabled to see blood during your match. When you disable blood, you won’t see blood or fatalities.

Effects Volume
Highlight this option, then press the Directional button Left or Right to increase or decrease the volume of the game’s Sound Effects.

Music Volume
Highlight this option, then press the Directional button Left or Right to increase or decrease the volume of the game’s Music.

Memory Card
Mortal Kombat Gold does NOT support the VMU. Even though it is listed in the menu, it is NOT functional. Do NOT attempt to enable the VMU.

Kombat Theater
You can view a character’s ending movie at any time by selecting the character’s icon in the Kombat Theater. Press the Right Trigger to view the selected character’s biography.
SELECT YOUR FIGHTER

After selecting any game mode, you'll view the Fighter Select Screen to choose the player you want to fight with. It displays all the available characters and 4 selection options.

Press your Directional button Up, Down, Left or Right to highlight a player or option, then press the A button to select. Included are 4 other on-screen options you can use to select your player(s):

RANDOM
When you select this option, the computer randomly chooses a character for you.

GROUP
When you select this option, the computer will display and select players in a particular order. You must defeat your opponent with each character chosen by the computer. Once you’ve defeated your opponent with all the characters, you can then fight with one of Mortal Kombat Gold’s hidden characters.

HIDDEN
This is handy for a 2 player game. If you don’t want your opponent to see the player you select, select this option first. It will hide your cursor, but make sure you keep track of how many times you select Up, Down, Left or Right. If you get confused, even YOU won’t know who you selected.

NOTE
If both players select the same warrior, both fighters will be displayed in contrasting colors.

CHOOSE YOUR DESTINY

WEAPON
Select this option to select your character's weapon. Press your Directional button Up, Down, Left or Right to highlight a weapon, then press the A button to select it. For a close-up look at each of the weapons, see The Weapons, pg. 35.

Once you’ve chosen your fighter in any 1-Player Mortal Kombat Gold mode, you’ll view the Destiny Screen.

Press the Directional button Left or Right to highlight a pillar, then press the A button to select one of these columns: Novice, Beginner, Warrior, Master or Master II. Press the Start button to rotate the pillar to choose a different sequence of opponents.

To claim ultimate victory, you must defeat each of the characters on the column. Each time you defeat an opponent, you’ll return to this screen and view your next opponent.

If a second player wishes to join the fight, he or she may do so at any time by pressing the Start button on the second controller. Both players then return to the Character Select screen to select a fighter.
FIGHTING SUMMARY

Mortal Kombat Gold tests a Warrior's fighting skills by pitting him against increasingly formidable challengers. In all Mortal Kombat battles, Health Meters in the upper portion of the screen measure each warrior's diminishing health.

The meters begin each round reflecting health at 100%, but the amount of health is reduced with each blow taken. The reduction amount depends on the type of contact and whether or not it was blocked. When a Warrior's Health Meter is depleted, he/she is knocked out and the round goes to the opponent.

Each round has a 99 second Match Time limit. If the time is up before either combatant has been defeated, the warrior with fewer injuries is declared the victor. The first warrior to win the match takes the match and moves on to the next opponent.

The Run Meter allows you to run toward your opponent and perform combos, but they are "time sensitive", so you can only activate the Run function (or Combo function) while the meter is green.

If you're defeated by an opponent, you'll find yourself plummeting helplessly into the darkness of a very deep pit. If you have a Continue available, press the Start button to return to the Select a Fighter Screen and select another fighter for battle.

BASIC MOVES

Each Mortal Kombat Warrior has spent years of concentration and intense training to perfect his/her martial arts skills. Before challenging these warriors in kombat, you'll also need intense training and concentration to learn these fundamental skills.

The best way to begin your training is with the fundamental moves: Kicks, Punches, Crouches, Jumps and Blocks.

These moves may seem trivial compared to powerful and acrobatic moves, such as a Flying Kick. However, knowing how to stop, avoid or counteract a flying kick can be far more useful than knowing how to land one yourself.

The Run button is especially powerful. Hold the Run button while pressing the Directional button toward your opponent to execute a run. But make sure you have a move ready when you meet face to face.
**KLOSE QUARTERS**

Moves used during close-in kombat situations are the **Elbow**, the **Knee**, the **Bonebreaker** and the **Throw**. They are highly effective and do not require full limb extension, which is impossible in close quarters. Although these moves are potent, they can only be used when you are directly adjacent to an opponent. Give it a try. Press the Attack Buttons in a certain sequence for different types of “Kombos”.

**BASIC KOMBAT MOVES**

All of the Mortal Kombat Gold warriors possess expert fighting skills. What raises them above their peers are the special moves which they’ve created and perfected. In order to become a superior warrior, skilled enough to win the title of Supreme Champion, you too must learn and perfect these moves. Whether you use special kicks or elemental bolts, Mortal Kombat Gold warriors are the fiercest and most ferocious combatants in the Universe. Mastering their special moves could propel you to that level of greatness (see next page).

**KROUGHING MOVES**

Defensively, the crouching moves let you escape from close proximity, avoid punches, aerial weapons and throws. Offensively, the uppercut executed from the crouch is one of the most powerful offensive weapons.

To do the crouching moves, hold the Directional button **Down** (Crouch) and simultaneously push **High Kick** or the **Low Kick button** for a crouching kick. Hold the Directional button **Down** (Crouch) and push the High Punch for uppercut. The **Block** can always be used to defend against your opponents moves.

**SPINNING MOVES**

The spin is the key to exotic moves, such as the Roundhouse Kick and the Foot Sweep. The Foot Sweep hits your opponents ankles and knocks him on his butt.

The **Roundhouse** is a spinning kick that nails your opponent in the face. To execute the spin moves, hold the Directional button away from your opponent while you press the **Kick buttons**.
AERIAL MOVES

The final moves one should learn are these Aerial moves: Flying Punches and Kicks. To execute these moves, either jump in place (Directional button UP) or towards (Directional button UP+Fwd/Back) your opponent. Press the game's various Attack Buttons while you're in the air. Unlike most attacks, aerial attacks must be timed properly to land blows.

SECRET KODES

At the bottom of the VS Battle Screen you will see a row of six boxes with different icons in them. Player 1 can change the symbols in the first three boxes by pressing the Low Punch, Block, and Low Kick buttons.

Player 2 can do the same with the other three symbols. The six symbols represent secret codes which can have subtle or dramatic effects on game play (see next page).

SECRET KODES

Some players find it easier to memorize the codes by referring to them in terms of the number of button presses it takes to get the proper symbols in place. In any case, you'll get the hang of it after a few tries. Remember, you have to be fast and precise. No one said this was supposed to be easy.

Note: You can find secret codes in store bought Strategy Guides, game magazines, the Internet or with a little experimentation on your part. Have Fun.

Pressing any code action button 7 times will cause the order of the icons to start over again. In other words, pressing A button that corresponds to a box with a skull symbol 7 times will change back to the skull icon.

Each button causes the symbol in the corresponding box to change to the next icon in a predetermined order. If you hold up while pressing either Low Punch, Block or Low Kick, the order in which the icons are cycled will be reversed.
Thousands of years ago in a battle with the fallen Elder God known as Shinnok, I was responsible for the death of an entire civilization.
